Extension Speech Recognition: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GK

Product map: what Extension Speech Recognition is for

WHAT IT IS

A SillyTavern extension that converts speech to text. It descends from the upstream SillyTavern speech recognition extension (see the credits below); this copy carries local chang.

WHAT GOES IN

The files at the top of the tree: index.js, browser.js, vad.js.

WHAT COMES OUT

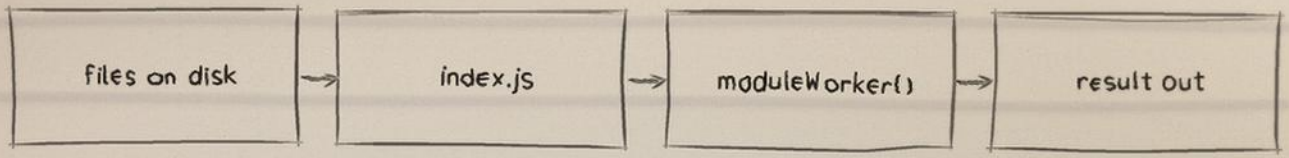

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

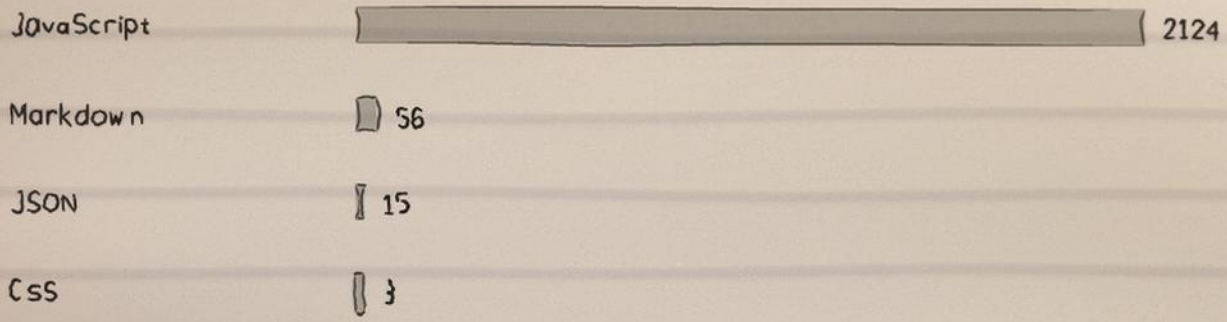

Extension Speech Recognition: data flow, in one direction

One direction. Anything the code does not do is not drawn.

Extension Speech Recognition in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

16 files in the tree.
44 commits, first 2023-10-13, last 2026-10-30, from the local git log.
No test files by name in this snapshot.

counted and drawn, OK

Extension Speech Recognition: schematic of the apparatus

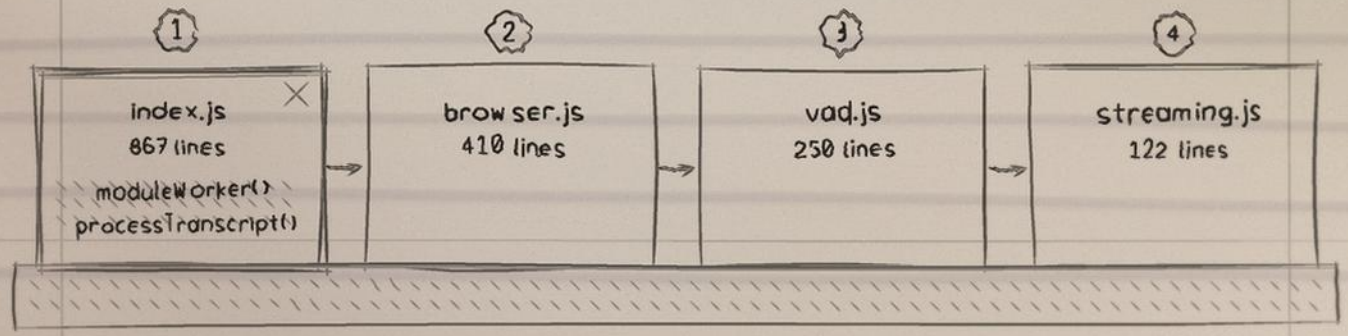

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

ports list

1. index.js
2. browser.js
3. vad.js
4. streaming.js

in flow order, first to last

base plate: the repo itself, sectioned

span: 16 files, 2198 lines counted

turns of the crank so far: 44 commits, 2023-10-13 to 2026-10-30

measured and sketched, GK
